Employment Experience

LogMeIn

Software Development Engineer – (Santa Barbara, CA)   August 2018 – February 2020

- Began the development of our project's Electron app and led it's onboarding to the other twenty engineers
- Collaborated closely with the UX and Product teams to implement features and manage timelines
- Exercised initiative in collaborating with an entirely distributed team spread across multiple time zones
- Organized and led LogMeIn's Accessibility Initiative for our local engineers and UX designers

Software Engineer Intern – (Santa Barbara, CA)   June 2018 – August 2018

- Built and deployed new features into two large-scale applications, as both a backend and frontend developer
- Followed the Agile/Scrum process, actively participating in daily team standups and grooming sessions

Westmont College   September 2017 – May 2018

Linux Network Administrator – (Santa Barbara, CA)

- Analyzed and solved a wide variety of network-related problems for all members of the campus community
- Utilized various network tools and wrote scripts to troubleshoot issues within the wireless network

Esri   May 2017 – August 2017

Web Application Developer Intern – (Redlands, CA)

- Deployed new features and bug fixes to the company-wide timecard/payroll web application
- Developed full-stack, mobile-first code built on MEAN Stack technologies
- Participated in the annual company hackathon, building a social routing app using the ArcGIS JavaScript API

Education
